All glyphs of PDU adhere to the limits
of the original stencil.

Initiated as a project at *Werkplaats Typografie*, *Dries Wiewauters*. began exploring a stencil based system originally designed by *Joseph A. David*. In 1876, *David* acquired the patent for a universal stenciling device system that he had invented for sign-writers,

whereby all UPPERCASE, lowercase, numbers, punctuation, accents etc. could be sourced from the grid of the stencil. *Dries* used this stencil, named the *Plaque Découpée Universelle (PDU)*, to begin an exploration into the liberties and restrictions of a unified grid. *PDU* is the culmination of that effort.

The font itself has three cuts: *Regular*, a filled version of the stencil; *Outline*, a cut staying true to the hand rendering of the stencil; and *Stencil*. Alongside these cuts are corresponding pattern cuts. *PDU* boasts a glyph count of 1,578 for each cut, alongside 229 glyphs included in the patterns. The corresponding pattern cut is provided free with the purchased regular and outline cuts of *PDU*. *PDU* is available in three cuts — *Regular*, *Outline*, and *Stencil* — with corresponding *Pattern* cuts, and contains copious alternative glyphs and other OpenType features.
